RES H/C SPREAD project

July 2016

Dear Readers,

I am pleased to present to you the latest outputs of our project “RES Heating and Cooling – Strategic Actions Development” (RES H/C SPREAD), which develops six pilot regional plans for heating and cooling from renewable energy and supports the planning efforts of other regions.

A number of [General project reports](#) will make you familiar with good practices, analyses and recommendations.

If you are interested in finding out the progress of the project activities and results in a particular project country, please visit the Country reports for [Austria](#), [Bulgaria](#), [Greece](#), [Italy](#), [Latvia](#), [Spain](#)

The pilot regional plans for RES H/C are currently in a final stage of development. The responsibilities for their implementation are being agreed with the relevant authorities. In parallel, we are working on the planning guidance for other regions.

Please visit www.res-hc-spread.eu regularly for the latest news and do not hesitate to contact me for further information and questions.

Yours sincerely,

Stefano Faberi
